

ADA Website Compliance Report: B&A Roofing

WCAG 2.0 AA Assessment & Remediation • 3/5/25

SAMPLE REPORT ONLY

SUMMARY

This sample report confirms WCAG 2.0 AA compliance for bandarroofingcompany.com as of March 5, 2025. We identified 118 accessibility issues on the website, resolving 114 through automated scans and limited manual checks (keyboard navigation, screen reader compatibility). We resolved all 95 missing alt text issues on the site, while skipping additional unused images hosted for newsletters. Four contrast errors were deemed false positives due to image overlay misinterpretation, requiring no further action. Compliance can be re-verified anytime at WebsiteAccessibilityChecker.com, although further changes in the website could shift the results. This point-in-time assessment demonstrates B&A Roofing's good faith effort toward accessibility.

ERROR & RESOLUTION DETAILS

ERROR TYPE	NUMBER FOUND	NUMBER RESOLVED	ADDITIONAL NOTES
Missing Alt Text	95	95	Skipped Email text images that are unused on website itself
Empty Links	7	7	
Contrast Errors	4	0	These errors are false positive because of being unable to interpret image overlay
Headings	1	1	
Noscript elements	15	15	Removed image caching system causing this problem
IDs Not Unique	1	1	

RECOMMENDATIONS

- **Maintain Compliance:** Ensure new content (e.g., images, links) includes alt text and meets contrast standards.
- **Order Headings:** If adjusting the websites, be sure to use sequential headings (e.g., H1, H2, H3) in new content to support screen reader navigation.
- **Schedule Follow-Up:** Opt for ongoing annual reviews (\$150/site/year) or quarterly checks (\$75/site/quarter) to address site updates.
